Summary

- Proficient in: Ruby on rails, HTML, CSS, RUBY, JAVASCRIPT with experience in using NODE.js/REACT, C# and C

- Lots of previous Team leader roles and experience working with groups and being able to organize and be time efficient.

- Really adaptable in the work space and full problem solving thought process to be able to solve any issues

Education

DIPLOMA of Information Technology

(2021-2022)

Coder Academy- Melbourne
Super Hands on course that gives a complete understanding on real world development and standards and pushes your code to be as clean and well done as possible.

Cert 4 Digital and interactive games

(2017-2018)

Swinburne University Hawthorn- Melbourne

Game design course that taught me the basics of coding I know today.

Work Experience

Owner of Dungeon.exe
(2020- 2021)

Dungeon.exe - Ringwood

Starting up and running my own business at Dungeon.exe as well as a site made quickly and maintained by myself through google sites. Facebook group here, with over 100 followers while streaming to the page. Dual streaming to Twitch Dungeon.exe as well. Did all the managing work, cleaning, bookkeeping and event management myself as well, I gained a lot of skills and knowledge through this experience; leadership, organization, website maintenance, social media coordination, marketing skills as well as a lot of people and new friends I made through the endeavour. 2020-2021.

Proud_Projects

Choose your own adventure game "terminal app project"

I made this as I was super excited to make a game at the time for this project with having complex mechanics and multiple endings I was very happy with the end product

https://github.com/jacobknightj12/T1A3_Choose_Your_Own_Adventure

Ferret adoption "marketplace project"

My goal for this project was to create a place for a group I am part of to list adoptable ferrets and when the list of people to adopt grows bigger than the amount of ferrets for people to apply to a wait list as the previous site used by the legend among the community had stopped updating probably due to the amount of effort and time required to update the wix website.
